Center, Institute, etc., Total	13	8	8	7	34	34	0	0	55	49	0				240	

[Note] 1. Enter the numbers of full-time instructors of undergraduate and graduate schools, professional graduate schools and research centers and institutes of the university in the blank columns.
Shaded columns contain formulas.
Count full-time instructors who are leaving the job temporarily due to a leave or sabbatical among full-time instructors. However, do not include "teachers who do not conduct classes" stipulated in Article 11 of the Standards for Establishment of Universities among "Full-time Instructors."

2. Count term-limited full-time instructors stipulated in the Act on Term of Office of University Teachers, etc., among full-time instructors. Regarding other term-limited instructors such as special professors and guest professors, count only those who are recognized as equivalent to full-time instructors according to their research conditions (only full-time workers) among "Full-time Instructors" and enter the total number of full-time instructors including the number of above mentioned term-limited instructors in the left portion of the "Full-time Instructor" column under the "Professor," "Associate Professor," "Lecturer" or "Assistant Professor" columns, and only the number of term-limited full-time instructors included in the total in the "Special Professor (included in the total)" columns. For special professors who do not fall under full-time workers, enter their number in the "Part-time Instructor" column.

3. Do not count a full-time instructor redundantly in several bachelor courses or master's courses. However, you may count a full-time instructor for several different levels of courses, such as bachelor and master's courses or master's and doctoral courses (provided that the person is counted one time in each course).

4. Enter the number of part-time instructors from outside of the university (including those who concurrently hold a post in an associated junior college) in the "Part-time Instructor" column.
If a part-time instructor teaches at several departments or graduate departments, count that person in every department (multiple counting is allowed). You may enter the numbers by schools instead of departments according to the structure of the university.

5. Regarding full-time administrative assistants (junior assistants, laboratory support personnel, etc.), teaching assistants (TA) and research assistants (RA), enter their position names and the numbers of the personnel engaged in the positions in the "Notes" column. If there is a department of pharmacology in the university, enter the number of instructors with practical experience in the "Notes" column.

6. In the "Number of Full-time Instructors Required by Standards for Establishment of Universities" column, enter the values that are figured out in accordance with the Appended Tables 1 and 2 of the Standards for Establishment of Universities for undergraduate schools, the 175th Public Notice of the Ministry of Education, Science, Sports and Culture issued in 1999, the "Number of Instructors Employed in Each Department of Graduate Schools" for graduate schools, and the 53th Public Notice of the Ministry of Education, Culture, Sports, Science and Technology issued in 2003, "Requirements Pertaining to Professional Graduate Schools" for professional graduate schools. If a department is established according to an approval that allows the school to use a method of calculation other than that used in this table, enter the values resulting from the calculation and the fact of the approval in the "Notes" column.

7. In the "Assistant" column, enter the number of all assistants engaged in jobs at the university regardless of their affiliations (e.g., an assistant of an undergraduate school who is concurrently engaged in a job at a graduate school must also be counted at the graduate school. An assistant working in master's, doctoral and professional degree courses in the same school must be counted among the assistants in the respective courses.)

<Regarding undergraduate schools and departments>

8. If there is an independent organization taking charge of a general education course, a foreign language course, a health and physical education course or a teacher-training course, enter the name of the organization and the number of its full-time instructors in the "Other Undergraduate School Educational Institute" column.

9. In the "Number of Enrolled Students per Full-time Instructor" column, enter the values calculated by dividing the number of "Enrolled Students (B)" on Table 4 by the "Total (A)" number of full-time instructors on this table. If there is an organization falling under the "Other Undergraduate School Educational Institute," proportionally allocate the instructors in the organization according to the volume of admission capacity of each school or department and calculate the Number of Enrolled Students per Full-time Instructor.

10. In the "Full-time Instructor" column, enter the number of full-time instructors including those who teach a course as a full-time instructor at a graduate school as well as its base undergraduate school (e.g., full-time instructors who are assigned to graduate schools teach all courses of undergraduate schools.)

11. If the educational structure and the instructor structure are different from each other at a university, enter appropriately the number of full-time instructors who are in charge of undergraduate school education, taking into account the required number of full-time instructors stipulated in the Standards for the Establishment of Universities.

<Regarding graduate schools>

12. "Research Instructor" refers to instructors who have the qualifications stipulated in clauses of Paragraph 1, Article 9 of the Standards for the Establishment of Universities. "Assistant Research Instructor" refers to
instructors who can assist in research instruction. Research instructors and assistant research instructors shall not be classified by whether the person is actually engaged in research instruction or assistance of research instruction, but by which qualification (designated by the university) the person possesses, his/her qualification for research instruction, or his/her qualification for
