[Note]

1 Add rows for each school/department (course), graduate school/major, or other/graduate department that recruits students

However, note that when adding departments, etc., the data must be placed under the relevant values to ensure the total is not skewed

2 For schools that adopt day/night course systems, enter the data separately for the day and the night course systems

- 3 If a reorganization of schools and departments has led to combinations of old or new departments, list both the old and new organizations, and leave a note to this effect in the "Remarks" column
- 4 If schools and departments or graduate schools and majors, etc., have not reached their final year (year of completion),

leave a note to this effect in the "Remarks" column

5 If the recruitment capacity is limited to several students, please enter [0], and add the actual number of students for "Enrollees.

6 Use the ratio of enrollees versus intake capacity as the "Intake Capacity Fulfillment Ratio," and the ratio of total students versus total student capacity as the "Total Student Capacity Fulfillment Ratio.'

7 The "Average Ratio Intake Capacity" represents the average ratio of enrollees versus intake capacity over the last five years, and is calculated automatically

8 Fall enrollment for the new academic year will be confirmed separately.

(Please include about the year prior to the current fiscal year. If you include the fall semester, please make it based on the information on the fall semester starting date.) 9 When assuming the Intake Capacity of transfer students, please do not add the Intake Capacity of transfer students

to the Intake Capacity of the table above (not those of).
